PROFILE SUMMARY

Experienced Oracle Apex, SQL and PL/SQL professional with strong expertise in database design, complex queries, stored procedures, functions, cursors, and performance optimization. Hands-on experience in developing and maintaining Oracle database solutions for real-world business scenarios, including reporting, data validation, and automation. Skilled in debugging, exception handling, and writing efficient, scalable database programs to support enterprise-level applications.

WORK EXPERIENCE

Azsm Enterprises JAN 2023 - PRESENT
Oracle Apex Developer

Legal Sure

An agentic AI legal application automating Saudi legal process for lawyers and common users.

- Implemented user interfaces and backend logic to support CRUD operations for case management.
- Built and integrated interfaces for session management and chat feedback handling.
- Developed interactive dashboards and reports in Oracle APEX to track case workflows and legal records.
- Integrated external REST APIs using APEX_WEB_SERVICE.MAKE_REQUEST to communicate with AI services and process Legal queries dynamically.
- Utilized PL/SQL procedures and Oracle database objects to securely manage legal documents and case-related data.

AI Helpdesk

An agentic AI assistant application automating customer support on manuals, support guides and issues resolution.

- Developed interfaces to manage RAG files and contextual knowledge sources.
- Designed dynamic APEX pages and interactive reports for managing knowledge sources and support documentation.
- Implemented database procedures and REST integrations to retrieve contextual knowledge for AI-driven responses.

AI FYC Helpdesk

An agentic AI assistant application that automates the financial year-closing process using structured guides and manuals.

- Designed interfaces for managing RAG files and contextual knowledge sources.
- Built interactive Oracle APEX workflows and dashboards to guide users through financial closing procedures.
- Optimized SQL queries and PL/SQL procedures for efficient retrieval of financial documentation and compliance guidelines.
